

LATESH PATIL

DevOps & Cloud Engineer | Microsoft Certified: Azure Solutions Architect Expert

Pune, India • +91-8459780257 • patillatesh17@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with 1.5+ years of experience designing, automating and operating cloud-native infrastructure on Microsoft Azure and on-premises platforms. Microsoft Certified: Azure Solutions Architect Expert with hands-on delivery across Kubernetes orchestration, CI/CD automation, Infrastructure as Code and DevSecOps. Improved deployment efficiency by 25% and reduced infrastructure overhead by 20% by migrating legacy workloads to Kubernetes, standardizing Jenkins pipeline-as-code frameworks and implementing GitOps-based delivery. Experienced in zero-downtime migrations, high-availability architecture sustaining ~99.9% uptime, and end-to-end observability with Prometheus, Grafana and the ELK stack.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (AKS, ACR, Application Gateway, Virtual Networks, Virtual Machines, VM Scale Sets, Storage Accounts, Azure Monitor), AWS (foundational exposure)

CI/CD & DevOps Tools: Jenkins (Pipeline-as-Code, Shared Libraries, Distributed Agents), Azure DevOps (YAML & Classic Pipelines, Repos, Deployment Groups), GitHub Actions, Git (branching strategies, PR workflows)

Containers & Orchestration: Docker, Docker Compose, Kubernetes, Azure Kubernetes Service (AKS), Rancher, Helm, ArgoCD (GitOps), Container Registry

Infrastructure as Code & Automation: Terraform, Ansible, Ansible AWX, Bash, Python, Groovy, YAML

Monitoring & Observability: Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Rsyslog, NXLog

DevSecOps & Security: Trivy, SonarQube, OWASP Dependency-Check, CIS Benchmarks, Nessus, RBAC, secrets management

Operating Systems & Virtualization: Linux (RHEL, Ubuntu), Windows Server, VMware vSphere, ESXi, vCenter, NSX

Networking & Databases: DNS, virtual networking, load balancing, reverse proxy; MySQL, PostgreSQL

Practices: CI/CD & release automation, GitOps, DevSecOps, Infrastructure as Code, Kubernetes orchestration, high availability & disaster recovery, observability & incident management, cloud migration & modernization, performance and cost optimization

PROFESSIONAL EXPERIENCE

Centre for Development of Advanced Computing (C-DAC)

Apr 2025 – Present

Project Engineer — DevOps Engineer

Noida, India

- Engineered pipeline-as-code CI/CD frameworks in Jenkins using modular shared libraries, standardizing build and release workflows across application teams and improving deployment efficiency by 25%.
- Embedded DevSecOps controls into CI/CD — Trivy container scanning, SonarQube static analysis and OWASP dependency checks — enabling continuous vulnerability detection and audit-ready releases.
- Led migration of legacy Docker workloads to Kubernetes using Rancher, standardizing deployments, improving scalability and reducing infrastructure overhead by 20%.
- Provisioned Azure infrastructure (virtual networks, DNS, compute, storage) with Terraform, replacing manual setup with repeatable, version-controlled and governance-aligned IaC modules.
- Implemented GitOps delivery with ArgoCD and Helm, giving every Kubernetes release a traceable Git source of truth with automated drift reconciliation and controlled rollbacks.
- Built end-to-end observability using Prometheus, Grafana and the ELK stack with custom dashboards and alert rules, reducing detection time for production issues and improving operational resilience.
- Delivered a zero-downtime datacenter migration of servers and storage, sustaining ~99.9% uptime through a highly available Kubernetes architecture.
- Automated end-to-end VMware VM provisioning and post-provisioning configuration via GitHub-triggered Jenkins pipelines integrated with Terraform, eliminating manual provisioning effort and ensuring consistent, version-controlled infrastructure delivery.
- Deployed and configured Ansible AWX for centralized configuration management — templated job execution, scheduling and role-based access — standardizing operations and reducing manual intervention.
- Hardened RHEL and Ubuntu systems against CIS benchmarks and implemented centralized logging (Rsyslog, NXLog), strengthening compliance posture and audit readiness.
- Administered VMware vSphere infrastructure — provisioning VMs, configuring datastores and maintaining high availability across on-premises environments.
- Automated recurring operational workflows with Ansible, Python and Bash, cutting manual effort and accelerating deployment velocity.

PROJECTS

DataPulse — High-Performance Analytics Pipeline Modernization	Docker • Jenkins • Groovy
- Engineered multi-stage Docker builds for Rust and Java microservices on distroless base images, achieving ~80% image size reduction and improving deployment speed and security posture. - Developed modular Jenkins shared libraries in Groovy, reducing pipeline duplication by ~70% and creating a reusable CI framework across services. - Enabled parallelized builds with distributed Jenkins agents running Docker-in-Docker (DinD), accelerating build cycles and increasing delivery throughput. - Established private container registry governance with image versioning and automated cleanup policies, optimizing storage and image lifecycle management.	

Secure & Scalable DevSecOps Platform	Kubernetes • Prometheus • Trivy
- Built security-first CI/CD pipelines with Trivy, SonarQube and OWASP scans enforced as quality gates, ensuring continuous vulnerability detection and compliance. - Deployed a full monitoring stack (Prometheus, Grafana, ELK) with custom dashboards and alerting to proactively manage SLAs and system health. - Architected highly available Kubernetes environments using readiness/liveness probes, pod disruption budgets and node affinity rules, delivering ~99.9% uptime. - Enforced CIS Level 1 standards on RHEL nodes and ran vulnerability assessments with Nessus, reducing exposure across the platform.	

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (AZ-104 + AZ-305) — Earned Sep 2026 — Credential ID: 18B1A38D67EBD023 Certification Number: 808296-370Q79 - Microsoft Certified: Azure Fundamentals (AZ-900) — Credential ID: B0291B55808A472A	
--	--

EDUCATION

Sunbeam Institute of Information Technology, Pune <i>PG Diploma in Advanced Computing (PG-DITISS)</i>	2025 Pune, India
SVIT Nashik — Savitribai Phule Pune University <i>Bachelor of Engineering, Computer Engineering</i>	2024 Nashik, India

ACHIEVEMENTS

- Winner, Sunbeam Institute Hackathon, and Top 10 academic performer in the PG-DITISS cohort (2025). - Gold Badge in Problem Solving on HackerRank, demonstrating strong algorithmic and analytical proficiency. 1st Rank, College Coding Competition, SVIT Nashik.
